

IMMIGRATION PROBLEM.

The Question Taken Up by Leading Philanthropists.

THEY FAVOR ITS REGULATION

And Restriction—The Labor Troubles Boom the New England Society. The Object to Pass Laws Permitting Only Desirable People to Enter, and to Keep Out the Criminal and Pauper Classes—Workingmen Joining the League.

Boston, July 15.—In about a week there will be ready for publication, it is expected, the constitutional list of officers of a new organization which is forming here for the purpose of restricting immigration to this country. Members are being added at the rate of eight to ten a day already, including some of the best known men of Boston and vicinity.

Among those who have joined are Prof. N. S. Shaler, of Harvard; Robert Treat Paine, one of the best known practical philanthropists of the city, who has done much for the workingmen and for the associated charities of Boston; George S. Hale, one of the leading lawyers, and an active sympathizer with the Mugwump movement of 1884; President F. A. Walker, of the Institute of Technology; Desmond Fitzgerald, Robert Codman, Clement K. Fay, of Brookline, a leading lawyer of Boston, and author of a pamphlet against woman suffrage; the Rev. Dr. Edward E. Hale and many others.

Thus far the circulars have been sent only to men in New England, but the movement will be broadened as soon as the organization gets under way. Already men who have heard of it have sent in their names from beyond New England and members are now on the list from New York, New Jersey, Pennsylvania and Florida.

SPURRED ON BY LABOR TROUBLES.

The effect of the recent labor troubles seems to be to emphasize the purpose of the movement and to bring men in rapidly. The name of "The Immigration Restriction League" has been taken.

The league has received support thus far from both parties in about the same proportion, and it is strictly a non-partisan movement.

The temporary executive committee of the league sent out the following circular to leading men in New England a few days ago and the new membership is in response. The purpose of the movement will be found therein set forth by those who shape the course of the league:

"The rapid increase of late years in the number of immigrants to the United States, the alarming proportion among them of the illiterate, the pauper and the criminal, and the disastrous effect that this flood of immigrants is already having upon the welfare of the laboring classes and upon the country's national institutions has led to the formation of the Immigration Restriction League. A working organization has been perfected of about 100 men interested in the public welfare. The league is non-partisan and non-political, and its success must depend largely on the personal work of its members.

OBJECTS OF THE LEAGUE.

"The objects of the league are to work for the further judicious restriction or stricter regulation of immigration. It will issue documents and circulars, solicit facts and information on the subject, hold public meetings, and in every way try to stir up public opinion to the necessity of some action. It is not an object of this league wholly to prohibit immigration nor prevent the entrance of laborers or others of character and standards which fit them to become citizens. The league intends not to be a theoretical but a practical working body. It will not at first attempt to advocate any one form or method of regulation, any one theory or hobby, but will endeavor to inform and keep before the public all facts and all possible methods in the hope of bringing about some reform in the present system, whatever nature it may be.

"It seems to the members of the league that this subject in all its bearings is only beginning to be understood, especially among laboring men. What ever views a laborer may hold upon the effect of the tariff upon wages, there can be but one opinion as to the influence of a flood of men living by lower standards upon the welfare of an educated American workman. A law which allows the admission of 14 per cent of immigrants who can neither read nor write, and which debars 1,830 out of a total of 440,000, needs some reform."

WORKMEN ASKED TO JOIN.

This is signed by Mr. Ward as Chairman and Samuel D. Parker as treasurer for the executive committee. Mr. Ward has been in correspondence on the subject with many men, and the movement here and now is said to owe its form to the advice of senators and representatives in Washington who have thought that there should be some organization to keep the information before the public, and about which public opinion would crystallize. The forthcoming constitution of the league will express its objects in words similar to the above, but modified as follows:

"The objects of the league are to work for and advocate the further judicious restriction or stricter regulation of immigration. It will issue documents and circulars, solicit facts and information on the subject, hold public meetings, and in every way try to stir up public opinion to the necessity of some action. It is not an object of this league to advocate the total exclusion of immigrants, nor to debar the entrance of laborers or other persons of such character and standards as fit them to become citizens.

It is said that laboring men are becoming interested in the league, and it is expected to bring into it many of the other classes who are just now taking the lead. The annual dues are fixed at \$1. The direct dues of the large body of members will consist in contributing this sum for the good of the cause, in attending the annual meeting, and in furthering the distribution of the documents which will be published from time to time.

A Grand Feature

Of Hood's Sarsaparilla is that while it purifies the blood and sends it coursing through the veins full of richness and health, it also imparts new life and vigor to every function of the body. Hence the expression so often heard: "Hood's Sarsaparilla made a new person of me." It overcomes that tired feeling so common now.

Hood's PILLS are purely vegetable, perfectly harmless, always reliable and beneficial.

DEBS' FAILURE.

Workers Scramble to Get Back Their Places—The Strike a Thing of the Past.

CHICAGO, July 15.—The action of the conference of the Federation of Labor Friday afternoon, supplemented by a motion of the Building and Trades Assembly Friday night, at which it was resolved to call off the strike and resume work at once is accepted universally as the deathblow of the Pullman boycott.

Of course Debs and Sovereign are saying that it is not over and that they are going to fight to the bitter end. Debs goes so far as to say that he will tie up every railroad in the United States, but he also says, or did say in a speech to 500 of the strikers: "The only thing that now remains for us to accomplish is to get you boys back to your work. We made a proposal to the railway managers to-day regarding this. We did not ask for recognition for the American Railway Union because you and I know that nothing will make a general manager sick so quickly as any mention of the A. R. U. We made the proposition to them that we would call the strike off if they would promise not to be prejudiced against you boys in taking on employees. All we asked them to do was to take back the honest, clean, former employees—the ones who had not committed any crime. We offered to come half way in settling the trouble. If any man here can suggest to us any fairer proposition we want him to do it; because you know we want to be perfectly fair in this matter. My heart goes forth in these times to the switchmen as the bravest and most loyal men that work on railroads to-day. The switchmen have more than once gone out to help firemen, engineers or conductors, but does anyone know of any of the other brotherhoods ever having gone out in sympathy with the switchmen? If the engineers and conductors had shown a loyal, brotherly spirit in this trouble and acted as the switchmen did, affairs would now be in a very different condition. I hope, boys, to see the day come soon when every railroad man and laborer will be ready and glad to lay down his work to fight for the rights of any body of brothers who are being wronged. Not until you are ready to do this can labor make any demands on capital."

This statement has been all of Debs' statements during the last forty-eight hours is accepted as acknowledgment that he recognized his defeat and is now engaged in an effort to undo the work he has been doing for the last two weeks. He called in conference the members of his executive board but they did not all respond.

For the most part the railroads are taking back their employees as fast as they apply and there were a great many applications this morning. They are not discharging any of the men who were employed to take the places of the strikers and such of the strikers as are re-employed are taken as individuals.

The federal troops are getting ready to leave. The camp on the lake front has been busy packing and orders for their departure are expected any moment. It is believed that their destination is California.

The state troops are also on the move, but enough will be held in Chicago to prevent any possibility of a renewed outbreak.

It may be truthfully said that with very few exceptions every man in Chicago, whether employed by railroads or belonging to the building and trades council, is seeking work on practically any terms offered.

Notes from Mountain Lake.

Special Correspondence of the Intelligence.

MOUNTAIN LAKE PARK, Md., July 14.—

The attendance at the Pentecostal meeting was never as large as now. Each day numbers of people are coming in. Last night a very large congregation heard Rev. Joseph Smith, of Indiana. Bishop Thoburn, of India, preached a fine sermon yesterday afternoon. He also gave a very interesting talk about India.

Mr. Jones, the Wheeling tinner, spent a few days with the family of Mrs. Stone. Rev. Wesley Davis and family, of Washington, Pa., are also guests of Mrs. Stone.

Rev. Wheeler, of Pittsburgh, arrived yesterday and is taking part in the meeting.

Dr. Vernon, one of Philadelphia's good preachers is here. So is Dr. Watson of Florida. He preached yesterday afternoon.

Dr. Davidson's family, of Cayahago Falls, O., moved into their cottage this morning.

Mrs. Dr. Robinson, of Owensboro, Ky., is a guest of the Allegheny House.

Mrs. Jane A. Johnson, of Parkersburg, is to take part in the W. C. T. U. convention, which opens on the 24th. Mrs. Caroline Bael will have charge of the convention.

The great Sam Jones is booked for August 10. He is to speak twice.

Prof. Hartigan, of Morgantown, is here. He is connected with the summer schools. This department of the Chautauqua is meeting with much success. Several students are now pursuing their studies.

Sunday, August 5, Rev. A. B. Riker, D. D., of Wheeling, is to preach the first sermon of the Chautauqua series. August 2, the University band, of Morgantown, gives the first of forty concerts to be given during August. They will play twice a day.

The strike has prevented quite a number of western and southern people from getting to the park. Ten from St. Louis and as many more from Louisville are not here. They had engaged board.

Mrs. List, of Wheeling, has twenty-one boarders. She is occupying two cottages. She is very successful in keeping boarders.

The camp meeting will close Monday night. The lively stable has been purchasing some new carriages—"nobby" affairs.

A Terrible Death.

Special Dispatch to the Intelligence.

HUNTINGTON, W. Va., July 14.—A terrible accident befell Albert Shelton, a young man of Barboursville, ten miles east of this city, last evening. He was subject to attacks of epilepsy, and had gone to a well to get drinking water. While hauling up the pail he was seized with a fit, and fell headlong into the opening to the bottom, a distance of thirty-five feet. He struck on his head, and received injuries that caused his death.

A Household Treasure.

D. W. Fuller, of Canajoharie, N. Y., says that he always keeps Dr. King's New Discovery in the house and his family has always found the very best results follow its use; that he would not be without it, if procurable. G. A. Dykeman, Druggist, Catskill, N. Y., says that Dr. King's New Discovery is undoubtedly the best cough remedy; that he has used it in his family for eight years, and it has never failed to do all that is claimed for it. Why not try a remedy so long tried and tested. Trial bottles free at Logan Drug Co.'s drug store. Regular size 50c, and \$1.00. 3

AN ARBITRATION BILL.

Approved by President Cleveland and Introduced into the House—Compulsory Features.

WASHINGTON, D. C., July 15.—Representative Springer, of Illinois, introduced in the house yesterday a bill providing for a national board of arbitration, to be appointed by the President. The bill is wider in its scope than the one under which the President will name the arbitration commission. It contains the compulsory feature, which was eliminated from the present law when it was before the Fiftyeth Congress.

Special significance is given to Mr. Springer's bill by the fact that it was read to the President before being introduced. It is said, moreover, that Mr. Cleveland suggested some modifications, although Mr. Springer declines to make any admission on this point.

The board is to be a part of the department of justice, and is to consist of three members appointed by the President, or two appointed by members and the commissioner of Labor. The members are to hold office for six years at a salary of \$5,000 each. They are to be empowered to settle such controversies arising between railroad or other companies engaged in transporting property or passengers among the states or to foreign nations and their employees which may hinder the transportation of property, passengers or the mails. The bill provides also:

Whenever either party to any such differences or controversies may desire to submit the same to arbitration a petition in writing, setting forth the facts thereto and praying for the relief which such party desires, shall be made. When such petition shall be received by the national board of arbitration the said board shall furnish the other party thereto with a copy of said petition, and with notice to appear at a time stated and make answer thereto.

When such answer is submitted a time and place shall be fixed for investigation thereof. Should such party decline to file an answer or refuse to make any appearance in the case, the said national board of arbitration shall proceed to make the investigation and render a decision thereon, the same as if an answer had been filed; provided, that when answer is filed and questions for determination are mutually submitted, the award or decision shall cover all questions so submitted; but when no answer is filed, or no questions mutually submitted, the award or decision shall go only to the extent of enforcing the rights which the petitioning party may have in law or equity.

It is proposed that the board shall have power to investigate all differences, whether called upon or not, and report to the President, and that in case of troubles within a state the intervention of the board may be tendered by the President.

The board is to be clothed with all the judicial powers conferred on commissions appointed by United States circuit courts. It is to be authorized to compel the attendance of witnesses, to administer oaths, etc. The hearings are to be held in public and the parties to the controversy are to be allowed to be represented by counsel and permitted to cross-examine witnesses. The award or decision of the board is to be certified to the United States circuit court in the district in which the investigation is held, and is to be entered as a decree of the court.

THREE GOOD THINGS.

"The Intelligence,"

Dr. Miles' Nervine,

Dr. Miles' Heart Cure.

It is with great pleasure and with considerable pride that we chronicle the large yet enormous sale of Dr. Miles' Nervine and New Heart Cure. These medicines have been advertised in our columns for some time, and like all other good things advertised there, have a large sale. The enormous demand for these medicines here is due to the INTELLIGENCER, supplemented by the great merit of the medicines themselves. This combination has made their sale phenomenal. Dr. Miles' Nervine is a scientific combination of the best and purest drugs by a remarkable process hitherto unknown. It contains no narcotics or opiates such as opium, morphine, chloral, etc., and is perfectly harmless if taken according to directions. It soothes, quiets and restores. It is a panacea for nervous people; it builds up, brings ambition to the discouraged, sleep, quiet refreshing sleep to the sleepless.

Dr. Miles' Heart Cure is a specific for heart disease. It has cured thousands of cases that have been given up by physicians. It heals, regulates and cures. These medicines are prescribed by hundreds of physicians. Why? Because they are superior to the medicines the general practitioner can compound or formulate, he has not the time even if he had the ability and inclination to follow out special lines of experiment and investigation. He cannot afford to do this any more than he can afford to make the instruments he uses, or the clothes he wears. These medicines are the result of twenty years' study and investigation by Dr. Miles, the great specialist in Nervous and Heart Diseases, and we know them to be medicines of extraordinary merit. We therefore speak from the heart when we say three good things.

To Cape May, Atlantic City and Sea Isle City, via B. & O., Thursday, July 19, '94.

Round trip, \$10. Tickets good twelve days, with stop off privileges at Washington, D. C., returning. Sleeper on the 5:35 p. m. train.

It Saves the Children.

"My little boy was very bad off for two months with diarrhea. We used various medicines, also called in two doctors, but nothing done him any good until we used Chamberlain's Colic, Cholera and Diarrhea Remedy, which gave immediate relief and soon cured him. I consider it the best medicine made and can conscientiously recommend it to all who need a diarrhea or colic medicine."—J. E. Hare, Trenton, Texas.

Excursion

NO. 16.

In the present number of

Glimpses

of America,

Viz., 16, our large company of excursionists now traveling through all the picturesque regions of the United States and Canada, are conducted into the world-famous

Yellowstone National Park

And Shown the Numerous Marvels of that Mysterious Region:

All the curious geysers, some of which vomit streams of mud, stones and water to a height of 200 feet, others that simmer like a Devil's stew, and growl like subterranean monsters; the extraordinary formations that resemble stalactites and rainbows; great canons with walls frescoed by nature in richest colors; rivers plunging over enormous precipices; basins of boiling water in cones rising from Yellowstone lake; snow-covered plateaus in summer; remarkable petrifications; lakes that look like prisms; fossils of extinct animals; Death Valley, and many other astounding wonders that render this the most truly unparalleled district of our globe.

These Amazing Curiosities of Nature,

in all the whims which she is capable of exhibiting, in all the magnificence of her variable charms, in the glory of her strength and the beauty of her protean attractions, are reproduced in GLIMPSES OF AMERICA, in a series of exquisite photographs and described in an equally eloquent and realistically graphic manner.
